

**AMENDMENTS TO THE SPECIFICATION**

**IN THE SPECIFICATION:**

*Please replace the paragraph beginning on page 1, line <sup>24</sup>31 with the following rewritten paragraph.*

As another solving means, there is utilized a solid-state image pick-up device including a photoelectric converting device having a relatively high sensitivity (which will be hereinafter referred to as a "high-sensitivity pixel" in some cases) and a photoelectric converting device having a relatively low sensitivity (which will be hereinafter referred to as a "low-sensitivity pixel" in some cases). Fig. 3 is a view showing the schematic structure of a solid-state image pick-up device having a so-called honeycomb structure, that is, a ~~conventional~~ solid-state image pick-up device comprising a photoelectric converting device having a high sensitivity and a photoelectric converting device having a low sensitivity.
